CMPUT 291 Mini Project 2 Report

Cynthia Li (sqli)   Michael Kwok (mkwok1)

November 2020

1   Project Overview

2   Running Instructions

This project requires the `blessed` python module:

```
pip3 install blessed
cd phase1
python3.5 phase1.py
cd ../phase2
python3.5 main.py
```

3   Design

4   Testing Strategy

5   Groupwork Breakdown

The group convened through the help of a Discord group chat, and code was hosted in a private GitHub repository. Black.py was used to ensure uniform formatting of code, reducing merge conflicts.

- Cynthia
    - Time estimate: 8 hours
    - Designed user flow
    - Implemented most states
    - Created user interface
    - Co-authored the report document
- Michael
    - Time Estimate: 10 hours
    - Wrote all of `database.py`
    - Unit tests in `tests.py` and corresponding test data
    - Made the `user.py` and `post.py` 'models'
    - Co-authored the report document
